Welcome to the 8th Workshop on Lung Health

Dear Colleagues & Friends,

The evolution of the Covid-19 Epidemic and the increasing travel restrictions, have forced the Presidents of the 8th International Workshop on Lung Health to reconsider the format of the congress.

In order to make available the programme to all the interested professionals in Europe and abroad that may be facing challenges to attend the physical event, the Organising and Scientific Committee have decided to adapt the **overall programme to a virtual format**.

The live sessions will take place on the same dates planned for the congress with the adding of an additional day, and precisely **from 13th to 16th January 2021**.

The “fil rouge” of the 8th edition remains “*Treatable Traits: a look forward*”. This controversial theme opens up to a new prospective approach with focus on the physiopathology of the “treatable traits” declined within the different diseases and related treatments. The purpose is to use this old / new tool to explore the future of the management of lung diseases: a look forward indeed!

Rising Stars, Posters (in the form of E-poster) live discussions will be preserved, while a change of format is expected for the **FuHeL (Future Health Leaders) programme**.

We kindly remind you that the **Call for Rising Stars** deadline has been postponed to October 26th, 2020 while the **Call for Abstracts** deadline is now set for November 16th, 2020. We invite you to submit and encourage the submission of the valuable works encouraging us to pursue this activity giving the opportunity to young clinicians and researchers to present their valuable work and become for the first time part of the Congress faculty.

We look forward to consolidate the existing **cooperation with national and international associations** for the promotion of the meeting and strengthen the promotional efforts and opportunities within the whole potential stakeholders.

Yours Sincerely,

Presidents & Chairmen
